ADVANCED NANO APPOINTS NON-EXECUTIVE DIRECTOR

Advanced Nanotechnology Limited is pleased to announce the appointment of Mr. Bruce Cameron as a Non-Executive Director of the Company.

Mr. Cameron is the Managing Director of Camco Engineering Pty Ltd, a privately owned and operated engineering, machining and fabrication business. Mr. Cameron has over 30 years experience in manufacturing and engineering and has developed specialist skills in production management, strategic planning, business process design, and information technology.

Harold Clough, Advanced Nano's Chairman, stated "Advanced Nano is very pleased Bruce Cameron will be joining the Board. Mr. Cameron will provide key manufacturing experience at a time the Company is significantly improving and expanding its manufacturing capability to meet the strong demand from its customers".

ADVANCED NANOTECHNOLOGY LIMITED

Advanced Nano develops, manufactures, and sells advanced nanomaterials products worldwide that deliver significant performance and value improvements to its customers' products, and is the only Australian public company to successfully operate in the rapidly expanding global nanomaterials sector. Advanced Nano's MCP™ nanopowder manufacturing technology is a patented, platform technology that enables the production of a broad range of high quality nanopowders and nanomaterials. The Company has achieved early revenues and strong growth through high value, short time to market products where the high quality of its nanomaterials provides a clear competitive edge.

The Company's first products are in personal care, coatings, plastics and environmental catalyst markets where product transparency and functionality are required attributes. The products are manufactured and marketed under three parent brands: ZinClear® – sunscreen dispersions that allow SPF 30+ sunscreens containing only zinc oxide as the UV absorber; Alusion® – soft focus effect pigments for masking ageing effects; and NanoZ® – nano zinc oxide additives that allow stable UV absorber performance for coatings and plastics. Advanced Nano also manufactures Envirox™⁽¹⁾, a fuel borne nanocatalyst for use in diesel fuel, for UK-based Oxonica plc.

(1) Envirox™ is a trademark of the Oxonica group.
